

Chokh-e-Dekha (CeD)

Citizen Voices → Transparent Actions

PTIB Civic Tech Challenge 2025

Team: Mohammad Azmain Hossain Alfi, Mahidul Islam Mahi , Moriyum
Chowdhury

The Problem: A Cycle of Frustration

Daily Civic Issues

Citizens grapple with broken roads, clogged drains, waste accumulation, and persistent waterlogging.

Reporting Maze

Reporting these issues is confusing, fragmented, and often leads to reports being ignored or lost.

Lack of Transparency

No clear tracking or feedback loops erode public trust, fostering an environment ripe for corruption and delays.

Authority Blind Spots

Authorities lack unified dashboards and actionable data, hindering effective response and planning.

Our Solution: Chokh-e-Dekha (CeD)

Chokh-e-Dekha (CeD) is a user-friendly digital platform designed to bridge the gap between citizens and authorities, ensuring civic issues are not just reported, but resolved transparently and efficiently.

Core Principles

- **Streamlined Reporting:** Simple digital submission for civic problems.
- **Transparent Workflow:** Clear report-to-resolution pipeline with real-time status tracking.
- **Empowered Citizens:** Public dashboards, engagement tools, and anonymous reporting for sensitive issues.

Key Innovations

- **Smart Triage:** AI-powered deduplication, urgency detection, and intelligent routing to correct authorities.
- **Knowledge Hub:** Legal guides, rights explainers, and referrals to empower citizens.
- **Community Participation:** Micro-surveys, open data access, and avenues for participatory budgeting.

The Citizen Dashboard: Your Voice, Your Track Record

Empowering Citizens to Act

The Citizen Dashboard provides a comprehensive overview of reported issues and fosters community engagement. Citizens can:

- Submit reports seamlessly with photos, precise locations, and detailed descriptions.
- Monitor the real-time progress of their issues, from "pending" to "resolved."
- Receive instant notifications via SMS or email regarding status updates.
- Endorse, comment on, and discuss existing issues to amplify visibility and urgency.

Seamless Reporting: Transparency in Action

A Community Newsfeed for Civic Issues

Chokh-e-Dekha transforms civic reporting into a dynamic public newsfeed. Citizens can browse all publicly submitted reports, seeing real-time updates and the collective state of their community's issues. This open view fosters collective awareness, encourages community endorsement, and ensures accountability by making the entire resolution process transparent to everyone.

Seamless Reporting: From Problem to Confirmation

Our intuitive step-by-step reporting flow makes it easy for anyone to submit a civic issue. We guide users through each stage, ensuring all necessary information is captured efficiently.

1

1. Basic Info

Enter a concise title, select the relevant category, and set the priority level for your report.

3. Submit & Confirm

Choose to add contact information or submit anonymously, then receive instant confirmation of your report.

1

2

3

2. Location & Evidence

Pinpoint the exact location on a map and upload supporting photos or videos to provide clear evidence.

The Admin Dashboard: Insights for Action

Empowering City Authorities

The Admin Dashboard transforms raw reports into actionable intelligence, providing city authorities with the tools to manage, track, and resolve civic issues effectively.

- View all reports in intuitive map and list formats.
- Utilize heatmaps and filters by ward, category, and status for targeted analysis.
- Efficiently assign cases with defined due dates and automated reminders.
- Monitor key performance metrics like backlog size and average resolution time.
- Export comprehensive reports for audits, strategic planning, and performance reviews.

Key Features: Enhancing Civic Engagement

Citizen Dashboard

Track issues, receive alerts, and engage with community discussions.

Admin Dashboard

Analytics, routing, and performance monitoring for efficient case management.

Anonymous Reporting

Secure channel for corruption cases with evidence chain-of-custody.

AI-Assisted Triage

Intelligent detection of urgency, duplicate reports, and efficient routing.

Legal & Rights Support

Access to legal guides, rights explainers, and RTI templates.

Open Data & Participatory Budgeting

Transparency through open datasets and tools for community-led budgeting.

System Integration

Seamless connectivity with 333 (helpline), 999 (emergency), and City ERP systems.

Impact & Benefits: A Win-Win for All

For Citizens

- **Simplicity:** Easy-to-use interface for reporting and tracking.
- **Transparency:** Clear visibility into the resolution process.
- **Trustworthiness:** Reliable system fostering confidence in governance.

For Authorities

- **Actionable Data:** Insights for informed decision-making and resource allocation.
- **Structured Workflows:** Organized processes for efficient issue resolution.
- **Performance Improvement:** Tools to reduce backlogs and improve response times.

Enhanced Governance: Reduced corruption, faster responses, and increased public trust. Scalable for nationwide impact.

The Engine Behind CeD: Robust Technology

Backend Foundation

Laravel (PHP): A powerful and elegant PHP framework ensuring robust and scalable server-side logic.

MySQL: A reliable and high-performance relational database for secure data storage.

Frontend Excellence

Blade: Laravel's templating engine for clean and efficient frontend development.

Tailwind CSS: A utility-first CSS framework for rapid and consistent UI design.

Key Integrations

AI Triage: Custom AI models for intelligent report classification and routing.

Map Integration: Seamless mapping services for precise location tagging.

APIs: Secure integration with national helplines (333, 999) and city ERP systems for unified operations.

Deployment & Scalability

Web Platform: Currently deployed as a web application, ensuring broad accessibility.

Mobile Ready: Designed for future expansion into dedicated mobile applications (iOS/Android) to maximize reach.

Our Team: Driving Change Together

Mohammad Azmain
Hossain Alfi

Project Lead & Developer

The visionary behind CeD, Azmain built the core backend, intuitive frontend, and analytical dashboards, bringing the platform to life.

Mahidul Islam Mahi

Technical Support & Research

Mahidul ensures CeD's robustness through rigorous testing and infuses it with cutting-edge civic-tech research for continuous improvement.

Moriyum Chowdhury

Community & Outreach

Marium bridges CeD with the community, aligning the platform with governance needs and channeling essential user feedback.

Why Us? We are a passionate team blending technical prowess with a deep civic vision and a commitment to social impact.
